# Top reasons for network door stations.

Axis network door stations combine video surveillance, communication and remote entry control **in a single device.**

3-in-1 = **Video surveillance** + **Two-way communication** + **Remote entry control**

They make a **valuable complement** to your surveillance solution, providing **reliable visual identification** and **voice communication** with visitors to help to keep your premises secure 24/7.

Why choose network door stations?

Extend your security system

Axis network door stations connect to any video management system, so you can leverage your current security solution to improve secure access to your premises.

Top-notch video and audio

WDR

Full-fledged Axis network video cameras with advanced technologies likeWide Dynamic Range (WDR) and great low-light performance, noise reduction and echo cancellation for always-reliable identification.
Direct or remote access control

See, talk to, identify, and then open the door to visitors directly or remotely from wherever you are. You can use your cell phone, IP phone or video management system to do it.

Smart analytics for extra security

Built-in intelligence and **audio and video analytics**, help keep you fully aware of what's happening outside your doors.
Complete freedom to choose

Open standards and interface gives you the freedom to mix and match best-of-breed hardware and software.

Scalability – absolutely future-proof

Add door stations, **expand** your communication system or **upgrade** the backbone of your system **as you grow**, while preserving the value of your investment.
